COURSE DETAILS AND INFORMATION FOR ECE6412 – ANALOG INTEGRATED CIRCUIT DESIGN II

Instructors: Dr. Phillip E. Allen, Room 292B, Van Leer, 894-6251 (office), (404) 603-9374 (home), pallen@ece.gatech.edu

Dr. Farrokh Ayazi, Room 204, MiRC, 894-9496, farrokh.ayazi@ece.gatech.edu

Lecture: Monday, Wednesday, and Friday, 10:05am to 10:55am, Room C456, Van Leer

Office Hours: Allen: 2-3pm, MW, 1-2pm F or by e-mail <pallen@ece.gatech.edu>.

Ayazi:

Electronic Copies of Class Handouts: You may download pdf copies of all classroom material at the following web site: http://users.ece.gatech.edu/~pallen/Academic/

Prerequisite: EE 4430 Analog Integrated Circuit Design I or permission of instructor.

Texts:

Analysis and Design of Analog Integrated Circuits – Fourth Edition, Paul Gray, Paul Hurst, Steve Lewis and Robert Meyer, John Wiley and Sons, Inc., 2001

CMOS Analog Circuit Design – Second Edition, P.E. Allen and D.R. Holberg, Oxford University Press, 2002.

Objectives: The purpose of this course is to enable the student to model, analyze and design analog integrated circuits using bipolar and/or MOS technologies. At the conclusion of the course, the student should be able to successfully perform the electrical and physical design of an op amp or analog circuit of similar complexity in an industrial environment.

Examinations: There will be three, closed book midterm examinations each of 50 minute duration and a 3 hour final examination. The final examination will be given during the regularly scheduled time for the final exam. All grades become final one week after they are returned in class.

Final Exam: The final exam is on Friday, May 2, 2003, from 2:50pm to 5:40pm.

Homework: Homework will be assigned and will be graded.

Course Grading Policy: Your grade will be determined using the following scheme:

Three midterm exams……	60%
Homework……	10%
Final Exam……	30%

Grades will be assigned on a curve and will not necessarily be consistent with 100>A>90, 90>B>80, etc..

Computer Usage: You are expected to be able to use HSPICE or PSPICE for classroom assignments. Most assignments using the computer will work on the student version of PSPICE. The educational version of PSpice for the PC is free and downloadable from:

http://www.orcad.com/products/pspice/eval_f.htm

Attendance: You are responsible for all course materials, announcements, notes, etc. made during our regular class meeting times. Prompt arrival to class is appreciated.

Academic Honesty: It is the responsibility of the instructor to encourage an environment where you can learn and your accomplishments will be rewarded fairly. Any behavior that compromises the basic rules of academic honesty as described in the General Catalog will not be tolerated.

Classroom Behavior: Smoking, drinking and eating is prohibited in the classroom by Institute rules.

Weekly Coverage of Topics for ECE6412

Week	Date	Lect. #	Topic	GHLM	AH
